Experience

On The Job Training

M Lhuillier Financial Services, Inc.

As an intern at M Lhuillier Financial Services, Inc., I gained practical experience in financial operations and customer service. My responsibilities included assisting with daily transactions, managing client inquiries, and supporting the team with administrative tasks. This internship enhanced my understanding of financial services and honed my communication and organizational skills.

WEB DEVELOPER

University of San Carlos (Capstone)

For my capstone project which is GreenCartPH, I developed an agriculture e-commerce website that connects farmers directly with consumers, featuring a real-time pricing system that adjusts based on market trends and supply-demand factors. This platform ensures fair rates for both parties and includes user-friendly interfaces for product listing, secure payments, and a rating system to enhance trust and transparency.

Education

University of San Carlos

Certificate of Computer Technology (2022 - Present)

Mactan National High School - Senior High School
